

FULLY 10-41

Three simple line-art icons of bicycles, representing the Fully category.

HARDTAIL 42-85

Four simple line-art icons of bicycles, representing the Hardtail category.

ROAD 86-117

Five simple line-art icons of bicycles, representing the Road category.

TREKKING 118-145

Seven simple line-art icons of bicycles, representing the Trekking category.

URBAN 146-159

Two simple line-art icons of bicycles, representing the Urban category.

KID 160-179

Four simple line-art icons of bicycles, representing the Kid category.

INFO 180-193

Three icons: a globe, a smartphone, and a bicycle, representing the Info category.

MADE IN AUSTRIA

Seit Jahrzehnten beweist KTM seine Kompetenz als einflussreicher und globaler Fahrradhersteller.

Die Fahrradtechnik hat sich vielfach verändert und enorme Fortschritte gemacht. Im Laufe dieser Zeit hat sich KTM zu einem der letzten verbliebenen Vollsortimenter entwickelt. Eines jedoch ist immer gleich geblieben: KTM baut nach wie vor "Bikes – Made in Austria".

Bereits das erste KTM Fahrrad Fleetwing trug 1964 das Gütesiegel Made in Austria. Mehr als 50 Jahre später ist KTM stolz darauf, seine Fahrräder wieder mit diesem Siegel zu versehen, das für höchste Qualität und modernste Technologien steht. Mittlerweile wird in mehr als 50 Ländern weltweit auf KTM Bikes – Made in Austria vertraut.

KTM has spent decades developing into an influential player in the global bicycle sector.

Bike technologies have changed enormously and the progress has been significant especially in the last decade. As the decades have past KTM finally became a manufacturer that covers the whole range of bikes. But one thing has never changed: KTM still builds bikes at its base in Mattighofen awarding the badge – Made in Austria.

The first KTM bike the Fleetwing, displayed the quality label Made in Austria (1964). More than 50 years later KTM is proud to label the biggest part of its bikes again with that mark standing for highest quality and state-of-the-art technologies. In addition to this, more than 50 countries around the world trust in KTM Bikes – Made in Austria.

TAPERED STEERER

Das konifizierte Steuerrohr erhöht die Steifigkeit und Lenkpräzision

The tapered steerer optimizes the riding feeling and increases the stiffness.

REMOTE FORK LOCKOUT

Die Lockout-Funktion der Federungs-elemente wird mit einem ergonomischen Hebel vom Lenker aus betätigt. Beide Hände bleiben sicher am Lenker.

The lock out function of the suspension elements is actuated with an ergonomic lever on the handlebar. Both hands remain safely on the bar.

REMOTE DAMPER LOCKOUT

Die Dämpfer Lockout Funktion wird mit einem ergonomischen Hebel vom Lenker aus gesteuert. Beide Hände bleiben immer sicher am Lenker.

The fork lockout can be controlled by an ergonomic remote lever and your hands remain on the bar.

REMOTE DROPPER POST

Um die volle Kontrolle bei schwierigen Abfahrten zu behalten, lässt sich mittels Lenkerfernbedienung samt vollintegrierter Zugverlegung die Sattelstütze absenken. Bei KTM nicht nur auf rein abfahrtsorientierten Bikes zu finden.

To maintain full control during difficult descents, the seatpost can be lowered with a handlebar remote control for ease whilst riding. The cable routing is also fully integrated.

BOOST 148mm

Der Boost Standard erhöht die Steifigkeit und ermöglicht ein effizienteres und präziseres Handling des Bikes. Durch die breitere Nabe lassen sich robustere Laufräder bauen.

The Boost Standard increases stiffness and allows a very efficient and precise handling of the bike. The wider hub makes it possible to build more robust wheels.

NANO PREMIUM CARBON

Hochmodulare Carbonfasern mit Nanomatrix. *Highly modular carbon fibres with nanomatrix.*

PC PREMIUM CARBON

Hochmodulare Carbonfasern. *Highly modular carbon fibres.*

PERFORMANCE CARBON

Carbonfaser-Mischung zur perfekten Anpassung an die unterschiedlichen Belastungszonen.

A mixture of different carbon fibres for a perfect adaption to the different strain zones.

1x12 GEARING

Durch den Wegfall des Kettenwerfers und des zweiten (dritten) Kettenblattes wird das Gewicht reduziert und die Bedienbarkeit vereinfacht. Die modernen 1x12 Antriebssätze bieten mit einer Übersetzungsbandbreite von bis zu 510% eine beinahe ebenbürtige Bandbreite im Vergleich zum 2x11 Antriebsatz.

Without a front derailleur and the use of only one chainring, the weight gets reduced and the operability becomes easier. With a gear ratio spectrum from up to 510%, all modern 1x12 drive trains provide almost the same gear range compared to the 2x11 versions.

12mm THRU AXLE REAR

Einfache und sichere Handhabung bei der Hinterrad (De-)Montage. Der durch das 12 mm KTM Thruaxle System versteifte Hinterbau setzt die Pedalkraft höchst effizient um.

Easy and safe handling with the rear wheel (dis-)mounting. Due to the 12 mm KTM thru axle system, the stiffer rear triangle converts the pedal force to be at its most efficient.

STRAIGHT LINE LINK

Die direkte Krafteinleitung in das Federelement reduziert Belastungen der Lager und des Rahmens. Gepaart mit dem geringen Übersetzungsverhältnis spricht der Hinterbau sehr sensibel an und lässt sich optimal auf das Fahrergewicht abstimmen. SLL ist auch optimiert für größere Federwege (SLL-LT)

The direct force application to the suspension reduces loads on the bearings and the frame. Coupled with the low transmission ratio, the rear end is very supple and can be perfectly adapted to the weight of the rider. SLL is also optimized for longer travel (SLL-LT)

FORK PICTURE BY SRAM

15mm THRU AXLE FRONT

Durch den größeren Achsendurchmesser und die stabile Verbindung der beiden Gabelholme wird eine erhöhte Lenkpräzision und ein verbessertes Ansprechverhalten der Gabel erreicht.

The larger diameter axle and the improved fork legs contact result in a higher stiffness as well as improved steering precision and characteristics.

iM INTEGRATED POSTMOUNT

Die Aufnahme des Bremssattels fügt sich nahtlos in das Rahmendesign ein und spart dadurch zusätzlich Gewicht.

The postmount is seamlessly integrated into the frame design which is additionally saving weight.

iFM INTEGRATED FLATMOUNT

Speziell für den Rennradbereich entwickelte Bremssattelaufnahme. Perfekt in den Rahmen integriert, um höchsten Ansprüchen gerecht zu werden.

To meet the high demands of our riders the Flatmount Disc Mounting is the ideal technology with a slim and elegant design

PROWLER

SONIC

Das 150 mm Adventure Fully für den Kolumbus der Alpen.

Die Zeit der großen Entdecker scheint lange vorüber, doch das PROWLER bringt ein Stück dieser Sehnsucht zurück. Mit diesem Fully steht deiner ganz persönlichen Expedition in die Wildnis nichts

mehr im Wege. Ob quer durch Wälder, über Bergketten, hin zum Secret-Spot oder im Bikepark, das PROWLER garantiert ein Trail-Erlebnis der Extraklasse und führt dich weit weg vom Alltäglichen.

Das Straight-Line-Link (SLL) Rahmen-Dämpfungskonzept steht nach wie vor für perfektes Ansprechverhalten und maximalen 150 mm Federweg-Spaß. Neben den stark ausgeprägten Downhill-Genen überzeugt das Prowler mit seinen Klettereigenschaften, die in diesem Bike-Segment seinesgleichen suchen. Ein niedrig angelegtes Cockpit und 75 Grad Sitzwinkel machen es möglich.

The 150 mm adventure fully for the Columbus of the Alps.

It seems the time of the great adventurers has long gone, but the PROWLER brings back some of this aspiration. With this fully you can immediately start your personal expedition into the wilderness.

Whether across the woods, over mountain ranges, straight to your secret spot, or down the bikepark, the PROWLER guarantees the superb trail experience and brings you far away from everyday life. The

Straight-Line-Link (SLL) frame damping technology still stands for perfect response and maximum 150 mm travel fun. Beside the strong downhill genes the Prowler satisfies you with its, for this bike segment unusual, climbing skills. Possible due to a low designed cockpit and a 75 degrees seat angle.

WHERE WE'RE GOING WE DON'T NEED ROADS.

SCARP MT

PRESTIGE

Unterschätze nie den Einfluss von mehr Federweg am Race Fully.

MT steht für Marathon und eröffnet ein neues Bike-Segment in der KTM Produktpalette. Das SCARP MT verbindet die Vorteile von mehr Federweg und dem neuen, ultraleichten 'Scarp Evo2' Race Fully Rahmen. 115 mm Federweg hinten und 120 mm vorne, geben Dir über lange Distanzen auch im

anspruchsvollen Gelände volle Kontrolle. Die „Straight-Line-Link“ Technologie macht es möglich. Zudem sorgt eine Trail lastige Ausstattung für den Genuss des extra langen Marathon Abenteuers. Ein Lenkwinkel von 67,5 Grad, genügend Platz für einen zweiten Flaschenhalter am neuen 'Scarp Evo2' Rahmen, sowie eine versenkbare Sattelstütze, runden das MT-Konzept ab.

Never underestimate the impact of more travel on a race fully.

MT stands for Marathon and creates a new bike segment in the KTM product range. The SCARP MT combines the advantages of more travel and the new, ultra-light race fully frame 'Scarp Evo2'. 115 mm rear and 120 mm front travel offers you full control for long distances even on rough terrain. The Straight-Line-Link technology makes it possible. Furthermore, a trail orientated specification ensures the pleasure of an extra-long marathon adventure. A

steering angle of 67.5 degrees, enough space for a second bottle cage on the new 'Scarp Evo2' frame, as well as a dropper seat post, wrap up the MT concept.

Das SCARP SONIC bildet die Spitze unserer High End Race Fullys.

Das SCARP SONIC ist für alle gebaut, die weit über ihre Grenzen hinaus gehen wollen. Gerüstet für jegliche Rennstrecken dieser Welt, ist dieses Rad für maximale Performance und Speed ausgerichtet. 2020 kommt

das Scarp mit einem neu entwickelten Rahmen 'Scarp Evo2' und erklimmt somit die nächste Evolutionsstufe. Mit einem Gewicht von 1.580g (Größe M/48cm) ist der Evo2 Rahmen um rund 10 Prozent leichter als sein revolutionärer Vorgänger und dies bei ebenbürtigen

Steifigkeitswerten. Erzielt wurde dieser Quantensprung durch die kompromisslose Auslegung des Rahmens auf Einfach-Kettenblätter. Die „Straight-Line-Link“ Technologie garantiert, wie gewohnt, perfektes Fahrverhalten und sensibles Ansprechen des Dämpfers. Die Race-Version wartet mit 100 mm Federweg vorne und 95 mm hinten. Neben einem flacheren Lenkwinkel von 68,5 Grad, wurde der Rahmen dank Unterrohr-Formveränderung für einen zweiten Flaschenhalter optimiert. Ab sofort gibt es das SCARP auch in Größe XS (38).

The SCARP SONIC represents the pinnacle of our high end racefullys.

The SCARP SONIC is built for all who want to push their bike to the limit. The Scarp Sonic is ready to take on the worlds most spectacular race tracks. This bike is made for maximum performance and speed. In 2020, the Scarp climbs to the

next stage of evolution and will be produced with the newly developed frame 'Scarp Evo2'. With still the same stiffness values and a weight of 1.580g (size M / 48cm), the Evo2 frame is around 10 percent lighter than its revolutionary previous version. As usual, the Straight-Line-Link technology guarantees perfect

handling and sensitive response of the damper. The race version is waiting with 100 mm front and 95 mm rear travel. In addition to a flatter steering angle of 68,5 degrees, the frame has a new down tube shape, optimized for a second bottle cage for those long distance rides. Also new for 2020 the SCARP will be available in an additional size of XS / 38cm.

MYROON

SONIC

Das MYROON ist der Leichtgewicht-Supersportler für den Geschwindigkeitsrausch.

Das einzige Problem am MYROON SONIC ist, damit langsam zu fahren. Sitzt du einmal auf diesem Biest, wirst du jede Sekunde versuchen, alle Möglichkeiten die es bietet, auszureizen. Steif, leicht und auf Vortrieb ausgelegt, wirst du glauben, eins mit der Maschine zu sein. Mit einem Rahmengewicht von nur 975 Gramm katapultiert sich das MYROON SONIC in die oberste Liga

der Mountainbike Hardtails. Eine Kombination aus Nano Carbon Technik und hochmodularen 40T Fasern sorgt für ein optimales Steifigkeits-Gewichtsverhältnis. Angriffslustig und doch leicht beherrschbar, begeistert das Bike auch in der Abfahrt.

The MYROON is the light weight speed hunter with super sports performance.

There's only one little problem with the MYROON SONIC, you cannot ride slowly. Once you sit on this epic mtb, you will try to out do all the possibilities it offers. Steif, light and trimmed to go forward, you'll never regret the purchase of this bike. With a frame weight of just 975 grams, the MYROON SONIC catapults itself into the top league of mountain bike hardtails. A combination of nano

carbon technology and highly modular 40T fiber ensures an optimal stiffness to weight ratio. Attractively and yet easy to control, the bike excites even on the downhill.

Erster Bloomers-Design-Thinking-Workshop bei KTM Fahrrad.

FROM WOMEN. FOR WOMEN.

Bereits in zweiter Generation wird KTM Fahrrad von starken Frauen gelenkt.

Johanna Urkauf zieht seit dem Vorjahr die Fäden des Unternehmens und rückte ihrer Mutter, Carol Urkauf-Chen, die in den Aufsichtsrat wechselte, nach.

Auf Frauenpower in der zum großen Teil Männer dominierten Fahrradbranche, setzt KTM auch bei der GLORY LINE. Dafür trafen im vergangenen Sommer beim „Bloomers - Design Thinking Workshop“, die Geschäftsführung, sowie Designer und Entwickler aus dem Hause KTM auf 13 Frauen aus der Szene, um das Thema „WOMEN ON BIKES“ nicht nur zu diskutieren, sondern spezielle Wünsche und Ansprüche, auch umzusetzen.

Das Endergebnis zeigt sich in der neuen GLORY LINE. Die Glory-Räder erstrahlen nicht nur in speziellem Design, sondern warten auch mit technischen Anpassungen. Spezielle Sättel und Griffe, kürzere Vorbauten, oder leichtere Übersetzungen sollen maximalen Fahrspaß garantieren.

NEW KTM GLORY LINE

Inspired by

Bloomers
women in their elements

ANNA WEISS
CO-FOUNDER
BLOOMERS

„Keine Lippenbekenntnisse: KTM bewies, dass es ihnen ernst ist mit den Frauen.“

Die gesamte Geschäftsführung samt aller Verantwortlicher nahm am Workshop teil. Die Offenheit, die Kritikfähigkeit und die ehrliche Neugier, mit der die KTM Manager*innen den Frauen begegneten, ist einzigartig in der Branche.“

Already in second generation, KTM Bike Industries is led by strong women.

Johanna Urkauf followed the footsteps of her mother Carol Urkauf-Chen, and is now at the helm of the company as managing director since last year.

We at KTM are proud to have Johanna Urkauf in charge and it is something quite special in the male dominated bicycle industry. Women's power is also the key word and was a key part in the thinking behind the KTM GLORY LINE. In summer last year, KTM held the Bloomers - Design Thinking Workshop, where the management, as well as designers and developers of KTM, met 13 opinion leading women who hail from the bike scene.

The aim was not only to discuss the topic of "WOMEN ON BIKES", but to realise and implement the special wishes of women as well. From this exciting meeting we can now show you the results in the new GLORY LINE: with different designs and technical adjustments like special saddles, grips, shorter stems or lighter gear ratios, we feel we have created a range of bikes women will love to ride. With comfort and design at the heart of this line, we hope all women of the world will be inspired to ride a KTM Glory.

"Small differences with a huge impact!"

"I attach particular importance to unique colouring and adapted geometry!"

"Perfectly matched specifications guarantee optimum riding pleasure!"

"In competition I can rely on my KTM bike. It has the ability to be dependable, aggressive and smooth!"

Das Alu-Hardtail für mehr Action.

Mit purem Spaß kann man das Fahrgefühl auf dem EVO am Besten beschreiben. Das ULTRA EVO ist KTM's speziell konzipiertes Trail-Hardtail. Ein high end Alu-Rahmen mit

Steckachse, Boost Standard und Postmount Bremssattelaufnahme bieten die Grundlage. Dazu passend auch die Ausstattung für den breiten Einsatzbereich. Vorne stehen satte 130mm Federweg zur Verfügung. Hinten bist das Fahrwerk du. Eine versenkbare Sattelstütze und Schwalbe Nobby Nic Reifen sorgen für Sicherheit bergab.

The alloy hardtail for more action.

Pure fun is the best way to describe the riding experience on the EVO. The ULTRA EVO is KTM's specially designed hardtail suitable for the trails. A high end aluminium frame

with thru-axle, boost standard and post mount which provides the basis for your trail flow. The bike is equipped with the right equipment for a wide range of use. Rich 130mm front-travel is ready to be ridden hard. The rear suspension is all you, with a dropper seat post and Schwalbe Nobby Nic tires the Ultra Evo ensures a smooth downhill ride.

**Der Klassiker
der begeistert.**

Der Rahmen besteht aus hydrogeformten, dreifach konfigurierten Rohren, welche präzise Fertigung und optimale Dimensionierung ermöglichen. Das speziell geformte Oberrohr erhöht die Schrittfreiheit und somit die Fahrsicherheit in jeder Situation. Das Ultra ist

der Alu-Hardtail-Klassiker der nicht enttäuscht. Der steife Boost-Hinterbau wandelt deine Pedalkraft effizient in Fortbewegung um. In Sachen Preis-Leistung sind die ULTRA Modelle unschlagbar.

**The classic that
thrills you.**

The frame is made of hydroformed, triple-butted tubes that allows a precise manufacturing and optimal sizing. The specially shaped top tube increases the freedom of

body movement and ensures ultimate control in every situation. The Ultra is the aluminum hardtail classic that does not disappoint. The stiff boost reartriangle efficiently converts your pedaling power into motion. In terms of value for money the ULTRA models are unbeatable.

Minimaler Luftwiderstand für neue Geschwindigkeitsrekorde

Internationale Rennerfolge bestätigen die perfekte Arbeit unserer Ingenieure. Das REVELATOR LISSE ist bis ins kleinste Detail auf Aerodynamik ausgelegt und bringt dich auf Antrieb in den Geschwindigkeitsrausch. Nach intensiver Entwicklungsarbeit wurde ein perfektes Konzept auf die Beine gestellt. Maßstäbe in der Aeroklasse setzt das Rahmengewicht von unter

1000 Gramm. Durch die Asymmetrie des Unterrohrs wird der Luftstrom auf die aerodynamisch günstigere, linke Seite des Hinterbaus gelenkt. Besonders sticht das Rad durch die Vollintegration der Züge hervor. Die Bremsleitungen verlaufen direkt durch den Vorbau und die Gabel in den Rahmen. Hervorzuheben ist, dass beim LISSE auch die Züge einer mechanischen Schaltung komplett integriert werden.

Als Alleinstellungsmerkmale gilt das KTM entwickelte, abnehmbare Vorbau-Oberteil, das die Arbeit an den Leitungen wesentlich vereinfacht. Spezielle Spacer ermöglichen eine rasche Veränderung des Vorbauwinkels, und nehmen Wartungs- und Anpassungsarbeiten den Schrecken. Neu am LISSE SONIC ist die SRAM eTAP AXS 12speed Schaltung.

Minimal wind resistance to achieve your personal bests.

International race victories confirm the perfect work of our engineers. Down to the smallest details, the REVELATOR LISSE is made for perfect aerodynamics and takes you

right into speed rush. After intensive development work, a perfect concept with a benchmark frame weight below 1000 gram was set up. Thanks to an asymmetric down tube, the airstream is led to the more aerodynamical left side of the rear frame end. Outstanding

the fully integrated cable routing. The brake wires run straight through the stem and fork into the frame. Even a mechanical drive train can be completely integrated. A unique feature is the KTM developed removable stem upper part that significantly simplifies the work on the cables. Special spacers allow a quick variation of the stem angle and make maintenance and adjustment work just easy. New on the LISSE Sonic is the SRAM eTAP AXS 12speed drivetrain.

TODAY'S RIDERS ARE MORE CAPABLE THAN EVER. So we designed for where road is going, not simply where it's been. SRAM eTap AXS™ offers wider range and closer progression, so you're always in the right gear. A quiet, secure and smooth ride, whatever the terrain. A system that does exactly what you want, when you want. And it's still wireless. Exploring new limits has never been easier.

Von Profis getestet und bereit für den Gipfelsieg.

Berge sind bei vielen Völkern schon von frühester Zeit an sagenumwobene Orte. Symbolisch stehen Gipfel für die Sehnsucht des Menschen, zum Göttlichen empor zu klettern. In den Bergen dein Zuhause finden und

klettern wie ein junger Gott, wirst du mit dem REVELATOR ALTO SONIC bestimmt. ALTO steht abgewandelt aus dem Italienischen/Spanischen für „hoch hinaus“ und soll damit in der Namensgebung auch den Einsatz als Berggämse, inklusive seiner perfekten Abfahrteigenschaften dank Disc, widerspiegeln. Alleine der Rahmen überzeugt mit einem Gewicht von 790 Gramm. Das Steckachssystem

versteift das kompakt konstruierte hintere Rahmendreieck effektiv, um die Antrittskräfte effizient auf die Straße zu bringen. Die hohe Seitensteifigkeit der Gabel bringt Vorteile im harten Wiegetritt. Ein asymmetrisch gestalteter Tretlagerbereich, sowie Hinterbau, gewährleisten maximale Effizienz bei starker Krafteinwirkung. Eine auch innen glatte und faltenfreie Oberfläche des Rahmens garantiert die Effizienz jeder einzelnen Carbonfaser.

Pro tested and ready to become king of the mountains.

Since the beginning of time, mountains are seen as legendary places. Symbolically, peaks stand for the yearning of man for climbing up to the divine. The REVELATOR

ALTO SONIC definitely makes you climb like a young god and let you find your home in the mountains. Translated from the Italian / Spanish language, ALTO stands for "high out", what reflects the bike's favourite terrain. Thanks to the discbrakes, it also provides the perfect descent skills. The frame alone convinces with a weight of 790 grams. The thru axle system effectively

stiffens the compactly designed rear triangle to bring all power on the road. The high lateral stiffness of the fork brings advantages when you push hard out of the saddle. An asymmetric bottom bracket area and rear frame section guarantee maximum efficiency under high force. A smooth and wrinkle-free inner-surface of the frame guarantees the efficiency of every single carbon fiber.

Das Beste aus jeder Situation herausholen.

Gravel ist nicht nur ein Trend, sondern ein ganz eigenes Gefühl Fahrrad zu fahren. Egal ob am täglichen Weg ins Büro oder auf der Mehrtagestour ans Meer, das X-STRADA wird dich sowohl auf Asphalt, als auch auf unbefestigtem Untergrund, nie im Stich lassen. Genügend Raum für breite Reifen, komfortable

Geometrie und Scheibenbremsen bringen dich immer ans Ziel. Dreifach konifizierte Rohre und kompakte Querschnitte verleihen dem Alurahmen Leichtigkeit. Nicht außer Acht gelassen wurden die spezifischen Funktionen wie Schutzblechbefestigungen und Gepäckträgeraufnahmen. Aus dieser Kombination entsteht eine sportive Optik, gepaart mit Funktionalität. Mit dem X-STRADA wirst du die Leichtigkeit des Radfahrens neu erleben. Auch in einer Glory Version oder als LFC erhältlich.

Making the most of every situation.

Gravel is not a trend, it is a memorable ride. Whether it's the everyday route into office, or a several days tour to the seaside, the X-STRADA will always be on your side, even on rough terrain. It has enough space for wide tires, comfortable geometry and disc brakes which will make your commute home as enjoyable as your leisure rides. Triple butted

tubes and compact lateral cuts give the aluminium frame its lightness. Special attention was paid to key features such as mudguards and luggage carrier mounts. This combination creates a sporty look, paired with functionality. The X-STRADA helps you to reexperience the easiness of riding a bicycle. The bike is also available in Glory and LFC version.

X-STRADA LFC

Ein Freund der mit dir durch dick und dünn geht.

Was will man mehr? KTM bietet erstmals ein Gravelbike mit ins Gesamtbild eingearbeiteter Komplettausstattung an. Das X-STRADA LFC ist dein täglicher Begleiter und bereit für jegliche Aufgaben. Es komplettiert mit

einer hochwertigen und leichten Straßenausstattung die neue KTM Gravel Serie. Unter anderem warten eine hochwertige B+M Akkubeleuchtung und der Tubus Vega Evo Träger auf den täglichen Einsatz. Neben seinem allround und allroad Einsatzzweck begeistert das X-STRADA LFC besonders durch sein makellooses Design.

A buddy who goes through thick and thin with you.

What more could you want? For the first time, KTM offers a gravel bike with the whole package. The X-STRADA LFC is your daily companion and ready for any mission. It is produced with high quality and light weight equipment such as sleek mudguards and the Tubus Vega Evo carrier. In addition it

also includes a high-quality B + M battery lighting ready for the daily use especially on those dark nights commuting home. And lets not forget that the X-STRADA LFC also impresses with a flawless design. It really is the whole package.

Vertraue auf traditionelle Trekkingbike Kompetenz.

Am Fahrrad die Seele baumeln lassen und die Natur genießen. Für diesen Idealzustand fehlt dir nur mehr das passende KTM Trekking-Bike. Die jahrzehntelange Tradition der KTM

Trekkingräder wird angeführt vom LIFE RACE. Alle Trekking-Offroad-Modelle bieten von der Bereifung mehr Grip als die Onroad-Verwandschaft. Integrierte Kabelzüge und ein in die Gabelbrücke eingearbeiteter Frontreflektor, sorgen für ein gewohnt schönes Erscheinungsbild.

Das konische Steuerrohr erhöht die Lenkkopfsteifigkeit. Bereits verbaut ist ein Fahrradständer. Andere Features wie Licht und Schutzbleche können bei Bedarf nachgerüstet werden. Das Topmodell LIFE RACE ziert eine Shimano Deore XT Bestückung.

Trust our traditional trekking bike capability.

With the Life Bikes you can indeed relax on the bike and enjoy nature. For this maximum satisfaction you only need the right KTM trekking bike. The decades long tradition of the KTM trekking bikes is led by the LIFE RACE. All trekking off-road models are equipped with suspension fork and offer more grip than the on-road brothers. Integrated cable routing and a

front reflector, incorporated into the fork bridge ensure a beautiful appearance. The conical headtube increases the steering head stiffness. Already on the bike is a stable kick stand. Other features such as lights and fenders can be easily upgraded when needed. The top model LIFE RACE graces a Shimano Deore XT equipment.

LIFE STYLE

Volles Trekking Know-How seit Generationen.

Das Rad zählt nach wie vor zu den beliebtesten Fortbewegungsmitteln auf Reisen. Die Trekking-Onroad Modelle von KTM blicken dabei auf eine wahre Erfolgsgeschichte

zurück. Bewährte Qualität und Funktionalität überzeugen seit Jahrzehnten und lassen keine Wünsche offen. Bei den Trekking-Onroad Modellen, wie dem LIFE STYLE, werden sogar die Kabel der Lichtanlage in den Rahmen integriert. Hochwertig wartet das Bike mit einem Gesamtpaket wie Schutzblechen,

Ständer, Shimano Deore XT Ausstattung und robustem Gepäckträger auf. Für reichlich Komfort sorgen Federgabel und ergonomisch geformte Griffe, die das Handgelenk entspannen. Erhältlich auch in der LIFE 8 BELT Variante mit Riemenantrieb. Mit den LIFE Modellen wird der Radweg dein Wohnzimmer.

Bundled trekking know how for generations.

The KTM Life range of bikes are still one of the most popular travel companions. Therefore, KTM's trekking on-road models history is one of true success. Proven quality and functionality have been

convincing cyclists for decades and leave nothing to be desired. At the trekking on-road models, such as the LIFE STYLE, even the cables of the lighting system are fully integrated into the frame. Furthermore, the bike comes with a complete package such as fenders, kick stand, Shimano Deore XT equipment and a

robust carrier. Front suspension and ergonomic shaped grips relax the wrist and provide plenty of comfort. Also available in the LIFE 8 BELT version with belt drive. With the LIFE models the bike path is yours.

BELT
DRIVE

Bereit für das urbane Abenteuer.

Mehr als die Hälfte der Weltbevölkerung hat sich in Städten angesiedelt. Schon seit der Antike gilt die Stadt als Platz der Begegnung und Auseinandersetzung. Die zunehmende Landflucht bringt auch einiges an Konfliktpotential mit sich, vor allem

in der Mobilität. Die Gründe dafür, dass viele Städter aufs Rad und in die Pedale steigen und urbane Mobilität inzwischen oftmals mit Fahrradmobilität gleichgesetzt wird, sind vielfältig. Die auf urbane Mobilität ausgerichteten Urban-Bikes

beweisen nicht nur absolute Tauglichkeit bei allen Tageszeiten, Witterungsverhältnissen und Bodenbeschaffenheiten. Sie krönen ihre Funktionalität auch mit puristisch-elegantem Design, das den Nerv der Pendler trifft. Das KENT 28.8 BELT ist KTM's Vorzeigemodell der Urban-Cityräder. Wartungsfreier Riemenantrieb, stabile Ausstattung und edles Design samt Vollausstattung. Neben dem KENT warten noch viele weitere Modelle. Im Sortiment der KTM Urban-Citybikes wird jeder seinen Liebling finden.

Ready for urban adventure.

More than half of the world's population has settled down in cities, but as the cities population grows, so does the chaos on the city roads. To battle this more cyclists are taking to the road to skip the traffic jams and make the cities theirs! The bicycle

has become a status symbol for the urban citizen. Urban Bikes are not only well known for their suitability and reliability in all conditions, they also crown their functionality with a sleek and elegant design that catches

the eye of commuters. The KENT 28.8 BELT is KTM's flagship model of urban city bikes. Maintenance-free belt drive, stable equipment and a cool design make it very special. In addition to the KENT many more models are available such as the Chester and Oxford. Everyone will find their favorite in the range of KTM Urban City Bikes.

YOUR CITY.
YOUR BIKE.

Weißenbach am Attersee

Sommerfrische am Attersee

Radurlaub im Salzkammergut

www.hotelpost-attersee.at

Sport, Kultur und Erholung

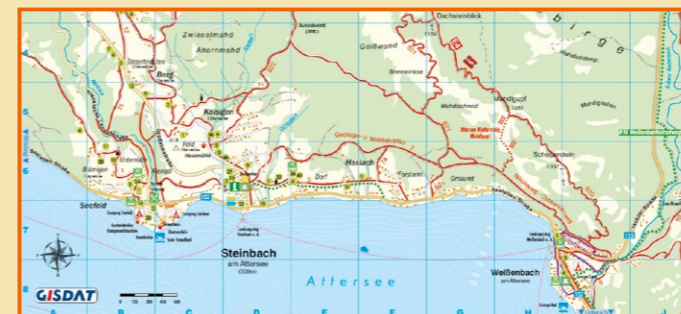

E-Bike, MTB & Rennrad Touren

Rund um den Attersee finden sich für alle sportbegeisterten E-Bike, Mountainbike- & Rennrad Fans zahlreiche Touren. Das umliegende Höllengebirge bietet für Mountainbiker die idealen Voraussetzungen. Von knackigen Trails bis hin zu gemütlichen Forststraßen - im Salzkammergut ist für jeden etwas dabei. Im Umkreis von 20 - 45 km erreichen Sie Bad Ischl und die schönsten Seen des Salzkammerguts. Wolfgangsee, Mondsee, Fuschlsee und Hallstättersee befinden sich praktisch vor Ihrer Haustüre.

Seenrunde Salzkammergut

Das Hotel Post liegt in einer der idyllischsten Regionen Österreichs. Herrliche Landschaften lassen sich auf dem Rad erkunden. Ein wunderschöner Tagesausflug rund um den Schafberg beginnt direkt am Hotel in Richtung Bad Ischl. Von der Kaiserstadt geht es in Richtung Wolfgangsee, wo Sie einen wunderbaren Blick auf den Schafberg genießen. Von St. Gilgen aus überwinden Sie den Scharfling, gelangen direkt an den Mondsee und fahren auf sanftem Gelände zurück zum Hotel.

KTM Fahrräder und eBikes für Hotelgäste

Für seine Gäste bietet das Hotel Post ein ganz aussergewöhnliches Zuckerl. Sie können kostenlos KTM eBikes und normale Fahrräder benutzen und damit die Gegend erkunden. Die herrlichen Salzkammergut Radwege warten nur auf Sie.

BESTIMMUNGSGEMÄSSER

GEBRAUCH

INTENDED USE

Fahrradrahmen und die dazu gehörigen Komponenten werden generell für unterschiedliche Einsatzzwecke und Nutzungsarten konzipiert. Jeder Fahrradtyp ist dabei für einen bestimmten Einsatzzweck gedacht. KTM stellt viele Kategorien von Mountainbikes, Straßen-, Renn- und Cyclocrossrädern, Trekking-, Touren-, Lasten- und Reiserädern sowie Kinder- und Jugendrädern her.

Wird bei der Nutzung des Fahrrades die Belastungsgrenze überschritten, so können das Fahrrad bzw. die dazu gehörigen Komponenten beschädigt werden. Falls dies der Fall ist, können Komponenten aufgrund von Vorschäden bereits bei einer viel geringeren Belastung versagen. Aus diesem Grund ist es wichtig, das Fahrrad entsprechend dem Einsatzzweck zu nutzen. Für Schäden, die aus der Nichteinhaltung der jeweiligen Belastungsgrenzen resultieren, bzw. welche aus Fehlgebrauch des Fahrrades stammen, haften Hersteller und Fachhändler nicht. Um die langfristige Sicherheit Ihres erworbenen Produkts auf Dauer gewährleisten zu können, ist die Einhaltung der vom Hersteller in der Gebrauchsanweisung vorgeschriebenen Betriebs-, Wartungs- und Instandhaltungsvorgaben zwingend erforderlich.

Machen Sie sich dazu vor allem mit den Kapiteln „Wartungs- und Pflegeintervalle“ sowie „Gewährleistung und Garantie“ vertraut.

Im nachstehenden Abschnitt werden unterschiedliche Kategorien definiert, welche sämtliche Einsatzzwecke und Belastungsgrenzen berücksichtigen. Ergänzend zu diesem Abschnitt empfehlen wir Ihnen, die Anleitungen der Komponentenhersteller bezüglich Informationen über bestimmungsgemäßen Gebrauch heranzuziehen.

KATEGORISIERUNG

Die KTM Fahrrad GmbH gibt die Kategorien 0-5 bzw. EPAC-Kategorien E0-E5 vor, welche sich vor allem in ihren Einsatzzwecken deutlich voneinander unterscheiden. Die verschiedenen Kategorien sind auf den nachfolgenden Seiten beschrieben.

Die zutreffende Kategorie ist direkt am Fahrrad/EPAC, im Bereich des Unter- bzw. Sattelrohrs, in Form eines Aufklebers (Fahrrad-Aufkleber - Symbolabbildung 1 / EPAC Aufkleber - Symbolabbildung 2) vermerkt. Zusätzlich informiert dieser Aufkleber über sämtliche relevante Daten Ihres Fahrrades/EPACs.

Bitte beachten Sie die Kategorie Ihres Fahrrades/EPACs und informieren Sie sich genau über die jeweils zutreffenden Einsatzzwecke bzw. Belastungsgrenzen. Auf diesem Sticker befindet sich bei EPACs auch die CE-Kennzeichnung.

Mit der CE-Kennzeichnung erklärt der Hersteller gemäß EU-Verordnung, „dass das Produkt den geltenden Anforderungen entspricht, die in den Harmonisierungsrechtsvorschriften der Gemeinschaft über ihre Anbringung festgelegt sind.“

Bicycle frames and the pertinent components are designed for various functions and types of use. Each type of bicycle is designed with a specific use in mind. KTM manufactures a whole host of categories of mountain bikes, road bicycles, racing bikes and cyclo-cross bikes, trekking bikes, touring bikes, cargo bicycles and expedition bikes as well as bicycles for children and youngsters.

If the maximum load is exceeded while using the bike, the bicycle and its components may be damaged. If your bicycle is damaged, it may fail even when placed under a lesser degree of further stress due to preliminary damage. Therefore, please make sure to use the bicycle only for its intended purpose. The manufacturer and specialist dealer do not accept liability for damage resulting from non-observance of the respective maximum load or from improper use of the bicycle. In order to ensure the long-term safety of your purchased product, observing the operating, maintenance and servicing instructions contained in the manufacturer's operating manual is obligatory.

In particular, please familiarize yourself with the chapters "Maintenance and Service Intervals" and "Warranty" of the user manual.

The following section defines various categories which specify all types of intended use and maximum load levels. In addition, we recommend consulting the component manufacturers' instructions relating to proper use.

CATEGORIZATION

KTM Fahrrad GmbH specifies Categories 0-5 or E0-E5, which are clearly distinguished from one another primarily by their intended purpose. The different categories are described on the following pages.

A label is positioned on the bicycle's down- or seat tube (bicycle-sticker - illustration 1 / EPAC sticker - illustration 2). In addition, this label informs about all relevant data of your bicycle/EPAC.

Please note the category of your bike / EPAC and inform yourself exactly about the respectively applicable purposes or load limits. This sticker also contains the CE mark on EPACs.

With the CE mark, the manufacturer declares in accordance to the EU regulation "that the product complies with the applicable requirements set out in the Community harmonization legislation for its installation."

Symbolabbildung 3 "Short Fender"
Illustration 3 "Short Fender"

Achtung: Werden bei Offroad Modellen zusätzlich Gepäckträger, Schutzbleche oder ein Kettenschutz montiert, ändert sich die Kategorie automatisch auf 2 bzw. E2. Ausgenommen sind sogenannte „Short Fenders“ (Symbolabbildung 3), die ohne Streben an der Gabel oder am Rahmen bzw. Sattel montiert werden können.

Attention: If additional luggage racks, mudguards or chain guards are mounted on offroad models, the category automatically changes to 2 or E2. Exceptions are so-called "short fenders" (Illustration 3), which can be mounted on the fork, frame or saddle without strays.

Symbolabbildung 1 "Fahrrad-Aufkleber"
Illustration 1 "bicycle-label"

Symbolabbildung 2 "EPAC-Aufkleber"
Illustration 2 "EPAC-label"

	Fahrrad-Aufkleber	EPAC-Aufkleber	Bicycle-Label	EPAC-Label
Zeile 1 - 2:	Name und Anschrift des Herstellers des Fahrrades	Name und Anschrift des Herstellers des EPACs	Name and address of the bike manufacturer	Name and address of the EPAC manufacturer
Zeile 3-4:	Modellbezeichnung inkl. spezifischer Baugruppennummer	Modellbezeichnung inkl. spezifischer Baugruppennummer	Model designation including specific assembly number	Model designation including specific assembly number
Zeile 5:	Höchstzulässiges Gesamtgewicht des Fahrrades*	Herstellungsjahr des EPACs	Maximum permissible total weight of the bikes*	Year of manufacture of the EPAC
Zeile 6:		Art der Maschine (EPAC), Nenndauerleistung des Motors (250 Watt), maximale Unterstützungsgeschwindigkeit des Motors (25 km/h).		Type of machine (EPAC). Continuous rated power of the motor (250 watts). Maximum support speed of the motor (25 km/h).
Zeile 7:		Höchstzulässiges Gesamtgewicht des EPACs*		Maximum permissible total weight of the EPAC*
Zeile 8:	ISO 4210-2: Fahrräder - Sicherheitstechnische Anforderungen an Fahrräder		ISO 4210-2 = Bicycles - Safety requirements for bicycles	
Zeile 11-12:		2006/42/EC = Maschinenrichtlinie 2014/30/EC = EMV-Richtlinie EN 15194 = Fahrräder - Elektromotorisch unterstützte Räder - EPAC Fahrräder		2006/42/EC = Machinery Directive 2014/30/EC = EMC Directive EN 15194 = Bicycles - Electromotive Assisted Wheels - EPAC Bicycles

*Das höchstzulässige Gesamtgewicht des jeweiligen Fahrradmodells stellt die Summe aus Fahrradgewicht + Fahrer + Zuladung dar und darf keinesfalls überschritten werden

*The maximum permissible total weight of the respective bicycle model represents the sum of bicycle weight + rider + luggage and must not be exceeded under any circumstances.

KATEGORIE 0 / E0

FAHRRAD-TYPEN

Kinderfahrräder

CHARAKTERISTIK DER KATEGORIE 0 / E0

Diese Fahrräder sind ausschließlich für Kinder gedacht. Fahrräder der Kategorie 0 / E0 dürfen keinesfalls von Jugendlichen oder Erwachsenen verwendet werden. Kinder dürfen niemals ohne Aufsicht Rad fahren. Außerdem sollten Kinder stets abseits von Straßenverkehr und anderen Gefahren oder Hindernissen und angepasst an ihre Fertigkeiten fahren.

ERLAUBTER EINSATZ

Die Verwendung von Fahrrädern aus der Kategorie 0 / E0 ist nur unter elterlicher Aufsicht gestattet.

NICHT ERLAUBTER EINSATZ

Kinder dürfen nicht in der Nähe von Gefällen, Bordsteinen, Treppen, Geländeabbrüchen, Kanaldeckeln sowie auf Wegen, die von Kraftfahrzeugen genutzt werden, Fahrrad fahren.

WISSENSWERTES

Die maximal einstellbare Sattelhöhe (siehe Kapitel „Anpassungen am Fahrrad“) darf nicht weniger als 435mm betragen sowie 635mm nicht übersteigen. Die Sattelhöhe stellt den senkrechten Abstand zwischen Boden und Oberkante des Sattels dar (Abb. 6).

TYPE OF BICYCLE

Children's bikes

FEATURES OF CATEGORY 0 / E0

These bikes are intended exclusively for children. Category 0 / E0 bicycles must not be used by youngsters or adults. Children should always be under the supervision of an adult while riding the bike. Furthermore, children should always cycle well away from road traffic and other dangers or obstacles and in accordance with their individual skills.

PERMITTED USE

The use of Category 0 / E0 bicycles is only allowed under the supervision of an adult.

NOT PERMITTED FOR USE

Children must not ride their bike in the vicinity of downward slopes, kerbstones, stairs, precipices, manhole covers as well as on paths used by motor vehicles.

FURTHER INFORMATION

The maximum adjustable saddle height (see chapter "Adjusting Your Bicycle") must not be less than 435 mm, while not exceeding 635 mm. The saddle height is the vertical distance between floor and top edge of the saddle (fig. 3).

KATEGORIE 1 / E1

FAHRRAD-TYPEN

Road Race, Time Trial, Triathlon

CHARAKTERISTIK DER KATEGORIE 1 / E1

Hierbei handelt es sich um die Kategorie von Fahrrädern, welche für den Einsatz auf gepflasterten Straßen oder glatten Fahrbahnen ausgelegt sind. Der Kontakt zwischen Reifen und Fahrbahn kann dabei unbeabsichtigt verloren gehen.

ERLAUBTER EINSATZ

Ausschließlich für den Einsatz auf asphaltierten Straßen.

NICHT ERLAUBTER EINSATZ

Für Offroad und Einsatz mit Gepäckträger oder Fahrradtaschen nicht geeignet.

WISSENSWERTES

Länderspezifisch kann es möglich sein, dass zum legalen Einsatz auf öffentlichen Straßen eine Nachrüstung mit Scheinwerfer, Reflektoren, Schutzblechen etc. nötig ist, um den nationalen Gesetzen zu entsprechen. Die für Trainingszwecke oder Wettkämpfe erforderliche sicherheitstechnische Ausstattung des Fahrrades aus Kategorie 1 wird mitgeliefert und muss vom Benutzer oder Fachmann regelmäßig überprüft und – falls erforderlich – instandgesetzt werden. Bei Schäden, welche aus der Benutzung des Rennrades im Gelände, aus Überladung und aus nicht ordnungsgemäßer Beseitigung von Mängeln resultieren, haften Hersteller und Fachhändler nicht.

TYPE OF BICYCLE

Road Race, Time Trial, Triathlon

FEATURES OF CATEGORY 1 / E1

This category refers to bicycles that are designed to be ridden on paved or smooth roads. The tyres may unintentionally lose contact with the road.

PERMITTED USE

Only for use on paved roads.

NOT PERMITTED FOR USE

Not suitable for off-road use in combination with luggage rack or panniers.

FURTHER INFORMATION

In some countries it may be necessary to retrofit the bicycle with head lights, reflectors, mudguards, etc. in order to use the bike on public roads in compliance with the national legislation. The Category 1 bicycle comes with the safety-related equipment required for training purposes or competitions. This equipment must be checked and if necessary repaired by the user or a trained specialist at regular intervals. The manufacturer and specialist dealer do not accept any liability for damage resulting from off-road cycling, overloading or incorrect remedy of defects.

KATEGORIE 2/E2

FAHRRAD-TYPEN

City, Trekking Onroad, Trekking Offroad, Cyclocross, Mountainbike Casual

CHARAKTERISTIK DER KATEGORIE 2 / E2

Hierbei handelt es sich um die Kategorie von Fahrrädern, welche den Einsatzzweck der Kategorie 1/E1 und zusätzlich ungepflasterte Landstraßen und Schotterwege sowie Strecken mit mäßiger Steigung / Gefälle umfasst. Kontakt mit unebenem Untergrund ist möglich. Die Reifen können dadurch den Bodenkontakt verlieren. Sprünge dürfen eine Höhe von 15 cm nicht überschreiten.

ERLAUBTER EINSATZ

Für asphaltierte Straßen, gut befestigte Schotterwege sowie Fahrradwege.

NICHT ERLAUBTER EINSATZ

Für den darüber hinaus gehenden Offroad-Einsatz sowie die Verwendung als Mountainbike bzw. für die Durchführung diverser Freestyle-Tricks nicht geeignet. Manche dieser Räder verfügen zwar über Federungssysteme, diese dienen jedoch lediglich dem Komfort, nicht aber der Geländetauglichkeit.

WISSENSWERTES

Fahrräder dieser Kategorie entsprechen bis auf Ausnahmen auf Grund ihrer Konzeption und Ausstattung, wie aktive (Rücklicht, Scheinwerfer) und passive (Reflektoren) Beleuchtungseinrichtungen, den gesetzlichen Anforderungen des Straßenverkehrs. Zudem ist die Nutzung auch auf für den Fahrradverkehr freigegebenen Feld- und Waldwegen gestattet. Die für diesen Einsatzzweck erforderliche sicherheitstechnische Ausstattung wurde mitgeliefert und muss vom Benutzer oder Fachmann regelmäßig überprüft und – falls erforderlich – instandgesetzt werden.

Einige Fahrräder dieser Kategorie entsprechen allerdings nicht den gesetzlichen Anforderungen des Straßenverkehrs und sind somit als Sportgeräte anzusehen. Falls Ihr Fahrrad nicht mit aktiven (Rücklicht, Scheinwerfer) und passiven (Reflektoren) Beleuchtungseinrichtungen ausgestattet ist, sind diese vor der Nutzung auf öffentlichen Straßen mit Komponenten, entsprechend der jeweiligen nationalen Gesetze und Vorschriften nachzurüsten.

TYPE OF BICYCLE

City, Trekking On-road, Trekking Off-road, Cyclocross, Mountain bike casual

FEATURES OF CATEGORY 2 / E2

This category refers to bicycles that can be used on unpaved roads and gravel paths as well as trails with moderate inclines / slopes in addition to the intended use of Category 1/E1. Contact with uneven ground poses no problems. Tyres may lose contact with the road. Jumps must not exceed a height of 15 cm.

PERMITTED USE

For paved roads, hard-surface gravel paths as well as cycle paths.

NOT PERMITTED FOR USE

Not suitable for off-road use that goes beyond the intended purpose. Furthermore, it should not be used as mountain bike or for freestyle tricks. Some of these bikes comprise suspension systems that enhance comfort, but do not increase off-road capability.

FURTHER INFORMATION

Although there are some exceptions, Category 2 bicycles comply with the legal requirements for participation in road traffic thanks to their design and equipment such as active (rear light, head light) and passive (reflectors) lighting systems. On top of this, these bikes can also be used on unpaved field and forest trails where bicycles are allowed. Category 2 bikes come with the safety-related equipment required for this type of use. This equipment must be checked and if necessary repaired by the user or a trained specialist at regular intervals.

However, some bicycles of this category do not comply with the legal requirements for road traffic and must therefore be regarded as sports equipment. Bicycles that do not comprise active (rear light, head light) and passive (reflectors) lighting systems need to be retrofitted with components compliant with the respective national legislation and regulations prior to usage on public roads.

KATEGORIE 3/E3

FAHRRAD-TYPEN

Mountainbike: Cross Country, Marathon, Tour

CHARAKTERISTIK DER KATEGORIE 3 / E3

Hierbei handelt es sich um die Kategorie von Fahrrädern, welche den Einsatzzweck der Kategorien 1/E1 und 2/E2 beinhaltet. Zusätzlich umfasst diese Kategorie unerschlossene Strecken sowie technische Bereiche. Sprünge bis zu 60 cm sind hier inbegriffen.

ERLAUBTER EINSATZ

Von leichtem bis hin zu anspruchsvollem Gelände (kleine Hindernisse, wie Wurzeln, Steine und Rinnen auf losem sowie festem Untergrund), während Cross-Country- oder Wettkampfeinsätzen. Cross-Country-, Marathon- und Tour-Komponenten (Reifen, Federung, Rahmen, Antrieb) verfügen über geringes Gewicht und sind für Wendigkeit und Geschwindigkeit ausgelegt.

NICHT ERLAUBTER EINSATZ

Für alle extremen Formen des Fahrens bzw. Springens wie z.B. Freeriding, Enduro, Downhill, Freestyle-Tricks u.dgl. nicht geeignet.

WISSENSWERTES

Diese Fahrräder sind aufgrund ihrer Konzeption und Ausstattung nicht dazu bestimmt, auf öffentlichen Straßen eingesetzt zu werden. Vor der Nutzung auf öffentlichen Straßen muss das Rad, entsprechend der jeweiligen nationalen Gesetze und Vorschriften, mit Beleuchtung, Schutzblech etc. nachgerüstet werden. Die für den Einsatz im Gelände erforderliche sicherheitstechnische Ausstattung wird mitgeliefert und muss vom Benutzer oder Fachmann regelmäßig überprüft und – falls erforderlich – instandgesetzt werden. Cross-Country-, Marathon- und Tour-Mountainbikes sind leichter, bergauf schneller und wendiger als All Mountain-, Trail- und Enduro-Mountainbikes. Antriebseffizienz und Klettereigenschaften werden bei Fahrrädern der Kategorie 3 über Robustheit gesetzt.

TYPE OF BICYCLE

Mountain bike: Cross Country, Marathon, Tour

FEATURES OF CATEGORY 3 / E3

This category refers to bicycles encompassing the intended use described in Categories 1/E1 and 2/E2. In addition, this category is suitable for undeveloped terrain as well as technical applications. Jumps up to a height of 60 cm are included in this field of use.

PERMITTED USE

Ranging from easy to challenging terrain (small obstacles such as roots, stones and trenches on loose as well as solid ground), for cross-country use or competitions. Cross-country, marathon and tour components (tyres, suspension, frame, drive unit) are lightweight and are particularly designed for excellent manoeuvrability and speed.

NOT PERMITTED FOR USE

Not suitable for extreme forms of riding or jumping such as freeriding, enduro, downhill, freestyle tricks, etc.

FURTHER INFORMATION

Due to their special design and equipment, these bicycles are not intended for use on public roads. Prior to cycling on public roads, the bicycle must be retrofitted with lighting, mudguard, etc. in compliance with the applicable national legislation and regulations. Category 3 bikes come with the safety-related equipment required for off-road usage. This equipment must be checked and if necessary repaired by the user or a trained specialist at regular intervals. Cross-country, marathon and tour bikes are more lightweight, faster going uphill and boast better manoeuvrability than all-mountain bikes, trail and enduro mountain bikes. With Category 3 bikes, propulsion efficiency and climbing capabilities are given priority over sturdiness.

KATEGORIE 4/E4

FAHRRAD-TYPEN

Mountainbike: Trail, All Mountain, Enduro

CHARAKTERISTIK DER KATEGORIE 4 / E4

Hierbei handelt es sich um die Kategorie von Fahrrädern, welche den Einsatzzweck der Kategorien 1/E1, 2/E2 und 3/E3 beinhaltet. Darüber hinaus umfasst diese Kategorie eingeschränkten Downhill-Einsatz. Downhills dürfen bis zu einer Geschwindigkeit von 40 km/h ausgeübt werden, solange Sprünge eine Höhe von 120 cm nicht überschreiten. Der Einsatz eines Fahrrades unter diesen Bedingungen ist stark von der Erfahrung und den Fähigkeiten des Fahrers abhängig.

ERLAUBTER EINSATZ

Fahrräder aus dieser Kategorie sind robuster und solider gebaut als Cross-Country-, Marathon- oder Tour-Mountainbikes. Auf Grund des höheren Federweges kann anspruchsvolleres Gelände mit größeren Hindernissen und Sprüngen bewältigt werden. Fahrräder aus dieser Kategorie decken einen großen Einsatzbereich ab.

NICHT ERLAUBTER EINSATZ

Einsatzgebiete, die den genannten Verwendungszweck überschreiten.

WISSENSWERTES

Diese Fahrräder sind aufgrund ihrer Konzeption und Ausstattung nicht dazu bestimmt auf öffentlichen Straßen eingesetzt zu werden. Vor der Nutzung auf öffentlichen Straßen muss das Rad, entsprechend der jeweiligen nationalen Gesetze und Vorschriften, mit Beleuchtung, Schutzblech etc. nachgerüstet werden. Die für den Einsatz im Gelände erforderliche sicherheits-technische Ausstattung wird mitgeliefert und muss vom Benutzer oder Fachmann regelmäßig überprüft und – falls erforderlich – instandgesetzt werden.

Da diese Kategorie eine Vielzahl von Einsatzgebieten abdeckt, ist es unerlässlich, die Grenzen des Einsatzzwecks dieser Räder zu kennen.

TYPE OF BICYCLE

Mountain bike: Trail, All Mountain, Enduro

FEATURES OF CATEGORY 4 / E4

This category refers to bicycles encompassing the intended use of Categories 1/E1, 2/E2 and 3/E3. In addition, this category is suitable for limited downhill use. Downhill rides are possible up to a speed of 40 km/h as long as the jumps do not exceed a height of 120 cm. Riding a bicycle under these conditions depends heavily on the rider's experience and capabilities.

PERMITTED USE

Category 4 bicycles have a particularly sturdy and solid construction compared to cross-country, marathon or tour mountain bikes. Due to the longer suspension travel, it is possible to tackle bigger obstacles and jumps. Bicycles of this category cover a broad range of applications.

NOT PERMITTED FOR USE

Fields of use which go beyond the mentioned intended purpose.

FURTHER INFORMATION

Due to their special design and equipment, these bicycles are not intended for use on public roads. Prior to cycling on public roads, the bicycle must be retrofitted with lighting, mudguard, etc. in compliance with the applicable national legislation and regulations. Category 4 bikes come with the safety-related equipment required for off-road usage. This equipment must be checked and if necessary repaired by the user or a trained specialist at regular intervals.

As this category covers a wide range of applications, it is vital to know the limits of the intended purpose for these bicycles.

KATEGORIE 5/E5

FAHRRAD-TYPEN

Fahrradtypen Mountainbike: Gravity, Freeride, Downhill

CHARAKTERISTIK DER KATEGORIE 5 / E5

Hierbei handelt es sich um die Kategorie von Fahrrädern, welche den Einsatzzweck der Kategorien 1/E1, 2/E2, 3/E3 und 4/E4 beinhaltet. Die Fahrräder sind zudem für Sprünge jeder Art bei darauffolgender Landung im abschüssigen Geländebereich sowie Geschwindigkeiten über 40 km/h ausgelegt. Die Verwendung in grobem, unwegsamem Gelände ist ebenfalls erlaubt. Der Einsatz eines Fahrrades unter diesen Bedingungen ist stark von der Erfahrung und den Fähigkeiten des Fahrers abhängig.

ERLAUBTER EINSATZ

Fahrräder für den oben genannten Einsatzzweck ermöglichen das Fahren in selektivem Gelände. Gravity-, Freeride-, und Downhill-Bikes sind äußerst robust gebaut und bieten sehr viel Federweg um Hindernisse bestmöglich bewältigen zu können. Aufgrund der hohen Belastung ist ein besonders pfleglicher und sorgsamer Umgang mit den Komponenten von Nöten.

NICHT ERLAUBTER EINSATZ

Verwendung über den persönlichen Grenzbereich.
Lassen Sie daher vernünftige Selbsteinschätzung walten.

WISSENSWERTES

Diese Fahrräder sind aufgrund ihrer Konzeption und Ausstattung nicht dazu bestimmt auf öffentlichen Straßen eingesetzt zu werden. Vor der Nutzung auf öffentlichen Straßen muss das Rad, entsprechend der jeweiligen nationalen Gesetze und Vorschriften, mit Beleuchtung, Schutzblech etc. nachgerüstet werden. Die für den Einsatz im Gelände erforderliche sicherheits-technische Ausstattung wird mitgeliefert und muss vom Benutzer oder Fachmann regelmäßig überprüft und – falls erforderlich – instandgesetzt werden. Wenn Sie beabsichtigen im Gelände zu fahren, welches dieser Kategorie entspricht, sollten Sie geeignete Sicherheitsmaßnahmen, wie beispielsweise häufigere Wartungsintervalle, ergreifen. Legen Sie großen Wert auf persönliche Sicherheitsausrüstung, wie z.B. einen geeigneten Helm und Protektoren. Bitte beachten Sie, dass Fehleinschätzung oder das Überschätzen der eigenen Fähigkeiten in dieser Kategorie schnell zu einem Unfall mit schweren Verletzungen oder gar Todesfolge führen kann.

TYPE OF BICYCLE

Mountain bike: Gravity, Freeride, Downhill

FEATURES OF CATEGORY 5 / E5

This category refers to bicycles encompassing the intended use of Categories 1/E1, 2/E2, 3/E3 and 4/E4. Furthermore, these bicycles are ideally suited for any kind of jumps with subsequent landing on sloping terrain as well as speeds up to 40 km/h. They can also be used in rough and difficult terrain. Riding a bicycle under these conditions depends heavily on the rider's experience and capabilities.

PERMITTED USE

Bicycles with the aforementioned intended use allow for riding in selective terrain. Gravity, freeride and downhill bikes have an extremely sturdy design and provide long suspension travel in order to successfully tackle obstacles. Due to the high stress, please make sure that you take good care of the components.

NOT PERMITTED FOR USE

Usage beyond your personal capabilities.
Therefore, knowing your capabilities and limitations is essential.

FURTHER INFORMATION

Due to their special design and equipment, these bicycles are not intended for use on public roads. Prior to cycling on public roads, the bicycle must be retrofitted with lighting, mudguard, etc. in compliance with the applicable national legislation and regulations. Category 4 bikes come with the safety-related equipment required for off-road usage. This equipment must be checked and if necessary repaired by the user or a trained specialist at regular intervals. If you intend to go off-road in terrain for which this category is suitable, you should take appropriate safety measures such as adhering to frequent maintenance intervals. Please attach the utmost importance to wearing safety equipment such as a suitable helmet and protectors. Bear in mind that misjudging or overestimating your own riding abilities in this category may easily result in accidents causing serious injuries or, at worst, death.
